Work Experience

Apr 2022 - Sep 2022

Senior Software Engineer
Zenoti

Worked as Senior Software Engineer using C#, ASP.NET, SQL Server, jQuery, HTML, CSS to optimize a product. Responsibilities also include migration of older code to newer version, creating API and maintaining related API document. Moving a sub-application out of the core application to make it lightly coupled. Researching on possibilities of future expansion of the product.

Nov 2021 - Apr 2022

Programmer Analyst

Boeing India Private Limited

Worked as Product developer responsible in developing software applications in Agile environment using technologies like .Net, Angular and maintaining CI/CD pipeline. Task includes using Docker, Azure TFS, GIT alongwith above mentioned frameworks.

My primary responsibility includes developing an application as well as contributing to a team of developers by sharing the relevant information. The task includes using technologies like .Net Core, Angular, Docker, CI/CD.

Nov 2018 - Apr 2019

Associate Projects

Cognizant Technology Solutions India Ltd

Worked as a Product Engineer involved in enhancement of the product. Responsible for analyzing the product and creating test cases and presenting to the clients. Build application for the working team to gather relevant data out of the product for further study.

Mar 2018 - Oct 2018

Technology Analyst

Infosys

Worked as a Full Stack developer using C#, SQL Server, Polymer. Primary task is to coordinate with the team, gather the requirements from the client and optimize the solution. Responsible in managing sub module and daily progress report.

Jan 2015 - Feb 2018

Delivery Software Engineer

Mphasis

3 years of experience in Web Application development using Microsoft technologies like C#, ASP.Net, MVC. Good knowledge in database management like MS-SQL Server 2014. Experience of working on Umbraco CMS. Experience of coding, testing and debugging. Also performed roles of QA and tester.

Projects

5 Months

MS System Center

System Center Configuration Manager is a tool provided by Microsoft for software management. Worked as Product Engineer responsible in optimizing the product. Build application for the team to gather relevant data. Analyzing the product and writing approved test cases.

7 Months

AssistEdge

Bank related application targeted to cater general public's needs.

Requirement gathering, analysis, code optimization. Migration of the application to different code. Daily meeting with the client to discuss the progress report. Building several modules using in-house framework.

6 Months

Digital Wall- Mobility

Application for the Schneider Electric's digital wall where one can view all the areas along with relevant details where Schneider Electric is working on. This application will run on digital screens at the reception where the user can choose different options available. This application can be controlled via iPad Controller or can be accessed through touch screen. Content is created using Umbraco CMS and after publishing generates JSON format file which contains the data, which in turn is used by the UI team which integrates this JSON with their view application written in Angular.

12 Months

Rubik - TFG

Application meant for Mphasis employees, in which an employee's bench management and allocation can be done thereby reducing time and improving accuracy. Employees can track their project allotment details and the resource management team can also track the details of employees on bench.

18 Months

VALIC Online Redesign - Facelift

Web application meant for AIG's customer to check and subscribe for insurance and retirement plan. This is a technology upgrade project to transform the user experience on the existing applications to provide a responsive user interface and to maximize the user engagement. This project uses service oriented architecture to deliver the data on demand and this has multichannel and multimedia mindset.

Technologies involved in the implementation include Microsoft.NET MVC, Microsoft.NET WEB API, Handlebar, JQuery and Responsive CSS frameworks.

Certification

- IELTS (Valid upto December 2021)
